

# Never Be Without Teeth

Patients travel from around the country to Denville, in search of the perfect smile.

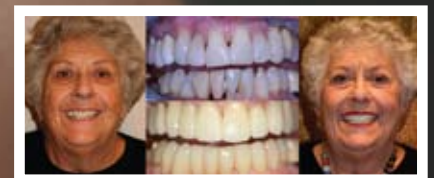

Denville is famous for its medical community. So, it's no surprise that a perfect smile is a must have item in this friendly town. Hand crafting those smiles is the life work of Dr. Steiner and Dr. Fine. Our office's reputation has spread so far that we now treat patients from around the world; often doing more smile makeovers in a single month than some dentists do in a lifetime.

We also offer an amazing alternative for those living with missing teeth, you will never be without teeth. This dramatic advancement in the field of dental implantology now makes it possible for many patients to switch from dentures to permanent implant supported teeth without being toothless. This new approach can be used to replace a single missing tooth or an entire mouth. Patients leave the office after just one appointment with a beautiful and strong smile. Discomfort is so minimal that most patients eat a light meal that evening.

Upon entering our front door you will immediately know that this is no ordinary dental office, because that's what most people say upon seeing it for the first time. Among our practice's notable patients are actresses, actors, astronauts, models and TV personalities. However most of the doctor's patients are everyday people who just want to look their best.

Drs. Steiner and Fine have focused their practice on those areas about which they are highly passionate. (After all you wouldn't ask your family doctor to do heart surgery.) Those areas are Cosmetic Dentistry. Trained at the prestigious Las Vegas Institute for advanced dental studies, they have devoted over fifty combined years to perfecting their skills and have placed over 23,000 cosmetic restorations. Our main focus is on cosmetic and full mouth reconstruction cases. This includes Implant Dentistry and Neuromuscular Orthodontics, which can avoid unnecessary removal of teeth. Many people do not realize that dental problems may be the cause of headaches, shoulder, back and neck pain, noisy jaw joints and pains in the TMJ.

Drs. Steiner and Fine pride themselves in having Morris County's premier head, neck and jaw pain relief center. Our office also offers a "limited warranty" that provides free repair or replacement of restorative dental work, when a patient's regular hygiene visits are maintained. This kind of security could only be offered by truly World Class Dentists. This is why our motto is: "Experienced professionals make the difference."
